Quick Start Guide

Smart Series DOAL Bracket

(Vision HAWK)

83-9200049-02 Rev A

Vision HAWK

1. The DOAL 50, 75 and 100 Lights use the same vertical bracket with designated hole patterns for each. Secure the vertical bracket to the DOAL Light using the two supplied screws as shown. See the detail to identify the correct holes for each DOAL Light.

2. Mount the Vision HAWK camera to the interface block using the two supplied screws as shown.

3. Mount the camera and interface block to the vertical bracket using the two supplied screws as shown.

Note:

Interface blocks will vary based on DOAL size. The DOAL 50 interface blocks are shown as an example.

The completed assembly is designed to be mounted using the M6 tapped holes and M6 clearance slots shown in the detail.

Caution: Be sure that all connections are secure BEFORE applying power. Power down BEFORE disconnecting cables.

Important: All specified wire colors apply to Omron Microscan cables. If non-Omron Microscan cables are used, it is the customer's responsibility to make sure the illuminator is connected per the specified connector pin numbers.
