## PREFACE Welcome!

#### **Purpose of This Manual**

This manual contains detailed information about the Vision HAWK Smart Camera.

#### **Manual Conventions**

The following typographical conventions are used throughout this manual.

- Items emphasizing important information are **bolded**.
- Menu selections, menu items and entries in screen images are indicated as: Run (triggered), Modify..., etc.

#### Preface

Introduction

1

## CHAPTER 1 Introduction

FIGURE 1–1. Vision HAWK Smart Camera

#### **Product Summary**

The Vision HAWK Smart Camera is a compact industrial smart camera that provides powerful machine vision capabilities with a small form factor and intuitive software interface. The Vision HAWK is designed for industrial environments where IP65/67 enclosure and rugged M12 connectivity are required.

Fully-integrated I/O and communications make the Vision HAWK easy to incorporate in virtually any machine vision application. Patented liquid lens autofocus and modular optical zoom enables the Vision HAWK to inspect objects at distances from 33 mm to 2 m and beyond.

Pressing the AutoVISION button at the back of the Vision HAWK enables real time dynamic autofocus. When an object is centered in the field of view and the AutoVISION button is pressed, the camera automatically adjusts focal distance and sets internal parameters to optimize image captures.

AutoVISION software, designed for use with the Vision HAWK, provides an intuitive interface, step-by-step configuration, and a library of presets that allow easy setup and deployment. For more complex vision applications, the system can be upgraded from AutoVISION to Visionscape.

#### **Features and Benefits**

- World's first vision system with liquid lens autofocus
- Integrated lighting
- Integrated Ethernet
- Flexible programming options for custom applications
- AutoVISION button for automatic targeting, calibration, and triggering
- Simplified configuration with AutoVISION software
- Fully scalable with Visionscape
- Applications can be ported to Visionscape PC-based machine vision

### Applications

- Automotive assembly verification
- Part identification
- · Label positioning
- Contents verification
- Electronics assembly verification and identification
- Semiconductor packaging and component inspection
- Auto ID (Data Matrix and other 2D symbologies, 1D, OCR)

#### **Package Contents**

Before you install AutoVISION software and connect your Vision HAWK Smart Camera, please take a moment to confirm that the following items are available:

- Vision HAWK Smart Camera Your package contains one of the available models listed in Table 1–1
- AutoVISION Software Installation USB Drive
- Required accessories such as a power supply or power cable

1

### **Vision HAWK Smart Camera Models**

Table 1–1 lists and describes the Vision HAWK Smart Camera models, including acquisition modes and resolutions.

| Part Number    | Vision HAWK Smart Camera Model  |
|----------------|---|
| GMV-6800-1110G | Vision HAWK, WVGA, Built-In Light, AutoVISION, 15° Lens               |
| GMV-6800-1210G | Vision HAWK, WVGA, Built-In Light, AutoVISION, 30° Lens               |
| GMV-6800-1310G | Vision HAWK, WVGA, Built-In Light, AutoVISION, 45° Lens               |
| GMV-6800-1112G | Vision HAWK, WVGA, Built-In Light, AutoVISION + Visionscape, 15° Lens |
| GMV-6800-1212G | Vision HAWK, WVGA, Built-In Light, AutoVISION + Visionscape, 30° Lens |
| GMV-6800-1312G | Vision HAWK, WVGA, Built-In Light, AutoVISION + Visionscape, 45° Lens |
| GMV-6800-1100G | Vision HAWK, SXGA, Built-In Light, AutoVISION, 15° Lens               |
| GMV-6800-1200G | Vision HAWK, SXGA, Built-In Light, AutoVISION, 30° Lens               |
| GMV-6800-1300G | Vision HAWK, SXGA, Built-In Light, AutoVISION, 45° Lens               |
| GMV-6800-1102G | Vision HAWK, SXGA, Built-In Light, AutoVISION + Visionscape, 15° Lens |
| GMV-6800-1202G | Vision HAWK, SXGA, Built-In Light, AutoVISION + Visionscape, 30° Lens |
| GMV-6800-1302G | Vision HAWK, SXGA, Built-In Light, AutoVISION + Visionscape, 45° Lens |

## CHAPTER 2 System Components

This section contains information about system components as well as information to help you connect the Vision HAWK Smart Camera. Specific information describes connectors, adapters, cables, pinouts, and signals.

Note: There are no user-serviceable parts inside.

#### **Hardware Components**

Table 2-1 lists Vision HAWK Smart Camera hardware components.

| Components |
|------------|
|            |

| Part Number    | Description   |
|----------------|---|
| Cameras        |   |
| GMV-6800-1110G | Vision HAWK, WVGA, Built-In Light, AutoVISION, 15° Lens               |
| GMV-6800-1210G | Vision HAWK, WVGA, Built-In Light, AutoVISION, 30° Lens               |
| GMV-6800-1310G | Vision HAWK, WVGA, Built-In Light, AutoVISION, 45° Lens               |
| GMV-6800-1112G | Vision HAWK, WVGA, Built-In Light, AutoVISION + Visionscape, 15° Lens |
| GMV-6800-1212G | Vision HAWK, WVGA, Built-In Light, AutoVISION + Visionscape, 30° Lens |
| GMV-6800-1312G | Vision HAWK, WVGA, Built-In Light, AutoVISION + Visionscape, 45° Lens |
| GMV-6800-1100G | Vision HAWK, SXGA, Built-In Light, AutoVISION, 15° Lens               |
| GMV-6800-1200G | Vision HAWK, SXGA, Built-In Light, AutoVISION, 30° Lens               |

#### TABLE 2–1. Vision HAWK Smart Camera Hardware Components (Continued)

### **Important Label Information**

Each Vision HAWK Smart Camera has its own label, which contains important information about that camera.

- P/N The Microscan part number of your Vision HAWK Smart Camera.
- S/N The serial number of your Vision HAWK Smart Camera.
- MAC The MAC address of your Vision HAWK Smart Camera.

## Mounting and Wiring the Vision HAWK Smart Camera

• Mount the camera (1) securely as required by the application.

- Connect the Ethernet cable (2) from "B" on the camera (1) to the network.
- Connect the power supply cable (3) to "3" on the QX-1 (4).
- Connect the trigger (5) to "T" on the QX-1 (4).
- Connect the "Common" cable (6) from "A" on the camera (1) to "2" on the QX-1 (4).
- Plug in the power supply (3).

### **Optoisolated Outputs**

The reader has optoisolated outputs that can transfer signals from the camera to peripherals. Outputs can be configured as either NPN or PNP, but NPN and PNP cannot be mixed in a system, because the output common is shared by all outputs.

#### **NPN Output for Host Input**

System Components

#### NPN Output for External Load

#### **PNP Output for Host Input**

#### **PNP Output for External Load**

#### **Optoisolated Inputs**

All discrete inputs are optoisolated. Inputs can be configured as either NPN or PNP, but NPN and PNP cannot be mixed in a system, because the input common is shared by all inputs.

#### NPN

CLC = Current Limiting Circuit

System Components

### Input/Output Wiring

#### **Power Requirements**

Refer to Table 2-3 when determining the power supply requirements for your camera.

|  | TABLE | 2–3. | Camera | Power | Requir | ements |
|--|-------|------|--------|-------|--------|--------|
|--|-------|------|--------|-------|--------|--------|

| Component                      |  |
|--------------------------------|--|
| Vision HAWK Smart Camera, CCD  | 5-28VDC, 200mV p-p max ripple,<br>170mA at 24VDC (typ.)<br>15 5 watts (max.) |
| Vision HAWK Smart Camera, CMOS | 5-28VDC, 200mV p-p max ripple,<br>135mA at 24VDC (typ.)                      |
|                                | 13 watts (max.)  |

### **Status Indicators**

The top of the Vision HAWK Smart Camera has multiple LEDs that indicate different trigger, inspection, camera, communication, and power states.

|           | On Steady   | Continuous Trigger                    |  |
|-----------|-------------|---------------------------------------|--|
| TRIG      | Off         | Waiting for Trigger Event             |  |
|           | On Flashing | Trigger Event                         |  |
|           | On          | Active State                          |  |
| PASS/FAIL | Off         | Inactive State                        |  |
| MODE      | On Steady   | Unit Ready                            |  |
|           | Off         | Unit Not Ready                        |  |
|           | On Steady   | Link Established                      |  |
| LINK/ACT  | Off         | No Link/Activity                      |  |
|           | On Flashing | Link Established and Activity on Link |  |
| PWR       | On          | Power On                              |  |
|           | Off         | No Power Applied to Unit              |  |
| OUTPUTS   | On          | Signal Sent to External Output        |  |
|           | Off         | No Signal Sent to External Output     |  |

#### Additional User Feedback

- Green Flash A green flash from the front of the unit indicates a Good Read.
- Red X Targeting Pattern The red X targeting pattern from the front of the unit allows the user to center an object in the camera's field of view.
- Beeper The beeper is an audible verification that either a Pass or a Fail has occurred.

### **AutoVISION Button**

The AutoVISION Button has two positions, selectable by the length of time the button is held down, and indicated by one or two beeps in succession. It can also be used to send a trigger signal when **Send Trigger** is checked in AutoVISION software's **Connect** view. When the trigger functionality is enabled, pushing the AutoVISION Button triggers the camera to capture an image.

| Auto Button | 📝 Enable Auto Button |
|-------------|----------------------|
|             | 🔽 Send Trigger       |

#### **1st Position: Red Targeting Pattern**

The first AutoVISION Button position turns the targeting system on. This overrides any other targeting modes that have been configured.

#### 2nd Position: Auto Calibration

The second AutoVISION Button position starts the Auto Calibration process, which selects the appropriate photometry and focus settings for the camera. The selected values are then saved for power-on.

## Setting Up a Job in AutoVISION

AutoVISION is a critical component of the Vision HAWK's functionality. Designed for use with the Vision HAWK, AutoVISION provides an intuitive interface, step-by-step configuration, and a library of presets that allow easy setup and deployment. For more complex vision applications, the system can be upgraded from AutoVISION to Visionscape.

1. Configure Vision HAWK hardware.

See Appendix A, **Connector Pinouts**, for Vision HAWK pin assignments.

| ltem | Description   | Part Number    |
|------|---|----------------|
| 1    | Vision HAWK Smart Camera                                      | GMV-6800-XXXXG |
| 2    | QX-1 Interface Device   | 98-000103-02   |
| 3    | Cordset, Common, M12 12-pin Plug to M12 12-pin<br>Socket, 1 m | 61-000162-01   |
| 4    | Cordset, Host, Serial, M12 12-pin Plug to DB9, 1 m            | 61-000152-01   |
| 5    | Cordset, Host, Serial, M12 12-pin Socket to DB9, 1 m          | 61-000153-01   |
| 6    | Power Supply, M12 12-pin Socket, 1.3 m                        | 97-000003-01   |
| 7    | Cordset, Host, Ethernet, M12 8-pin Plug to RJ45, 1 m          | 61-000160-01   |
| 8    | Trigger, M12 4-pin Plug, NPN, Dark On, 2 m                    | 99-000020-02   |

Note: Additional cables available in the Microscan Product Pricing Catalog.

#### Chapter 2 System Components

- Mount the camera as required by the application.
- Connect the Ethernet cable from "B" on the camera to the network.
- Connect the power supply to "3" on the QX-1.
- Connect the photo sensor to "T" on the QX-1.
- Connect the "Common" cable to "2" on the QX-1 and "A" on the camera.
- Plug in the power supply.
- 2. Select your Vision HAWK in the AutoVISION Connect view, create a job, and adjust camera settings.

AutoVISION's **Connect** view allows you to select your device and configure its settings, and to create a new job. The **Select Device** dropdown menu provides a list of available devices. Hover the mouse over a device to see its details.

Click the lock icon to take control of the camera. When you have control of the camera, the **Modify** button will appear beneath the camera settings. Click the Modify button to adjust camera settings. **Note:** The default IP address of the camera is: **192.168.254.3**.

**Important:** When modifying camera settings, you will need to enter a username and password for the camera. The default username and password are:

- Username: Microscan
- Password: vision

Once you have selected your camera, adjusted its settings, and created a new job, you will move to the **Image** view. This view allows you to **Auto Calibrate** the camera, and to manually adjust the camera's Exposure, Gain, and Focus, and also to set the Lighting Mode (On, Off, or Strobe).

## Chapter 2 System Components

3. Edit the Job in AutoVISION.

After you have created a new job, loaded a job from your PC, or uploaded a job from the camera, you will proceed to the Edit view to refine your machine vision job. The Camera parameters below the captured image allow you to set Gain, Exposure, Focus, Trigger, and Lighting. Inspection Outputs options allow you to connect your job to the outside world. This is also the view where you can add multiple tools to the job. The tool icons are located above the main view area.

4. Run the Job in AutoVISION.

Going to the **Run** view will automatically download your job to the camera and start it running.

5. Save the Job.

Click the **Save to Camera** icon on the File menu bar to save the job to the Vision HAWK.

## Chapter 2

## CHAPTER 3 Optics and Lighting

This section describes the optical and illumination characteristics of the Vision HAWK Smart Camera.

## Optics

The Vision HAWK Smart Camera is available with a built-in CMOS sensor or CCD sensor.

#### **Optics Specifications**

#### Illumination

The Vision HAWK Smart Camera has built-in lighting (red LEDs for SXGA models and white LEDs for QXGA models). The LEDs can be configured to operate in multiple modes – Continuous, Strobe, and Off.

### **Lighting Specifications**

| Part Number | GMV-6800-   | GMV-6800- | GMV-6800- | GMV-6800- | GMV-6800- | GMV-6800- |
|-------------|-------------|-----------|-----------|-----------|-----------|-----------|
|             | 1100G       | 1200G     | 1300G     | 1110G     | 1210G     | 1310G     |
|             | GMV-6800-   | GMV-6800- | GMV-6800- | GMV-6800- | GMV-6800- | GMV-6800- |
|             | 1102G       | 1202G     | 1302G     | 1112G     | 1212G     | 1312G     |
| LED Color   | Red @ 617nm |           |           |           |           |           |

#### **Machine Vision Lighting Principles**

Proper lighting is critical to the success of a machine vision application. The Vision HAWK features integrated high-output lighting (.564mW, 617nm). Depending on the requirements of your application, you may also need to add external lighting from Microscan's NERLITE family of machine vision lighting products.

Consider the following when setting up your application:

- Is the surface of the object flat, slightly bumpy, or very bumpy?
- Is the surface matte or shiny?
- Is the object curved or flat?
- What is the color of the object or area being inspected?
- Is the object moving or stationary?

Machine vision lighting should maximize contrast of the areas or features being inspected while minimizing the contrast of everything else.

**Before correct lighting** 

After correct lighting with a NERLITE CDI Illuminator

## APPENDIX A Connector Pinouts

This section contains information about Vision HAWK Smart Camera connectors:

- M12 12-Pin Plug on page A-2
- M12 8-Pin Socket on page A-3

Connector Pinouts

### Vision HAWK Smart Camera Connectors

#### Connector A – M12 12-Pin Plug – Power, I/O, and Serial

Figure A–1 shows the M12 12-pin plug at connector A.

FIGURE A-1. Connector A - M12 12-Pin Plug

Table A–1 describes the M12 12-pin plug signals.

TABLE A-1. Connector A - M12 12-Pin Plug

| Pin | Function      |
|-----|---------------|
| 1   | Trigger       |
| 2   | Power         |
| 3   | Default       |
| 4   | Input 1       |
| 5   | Output 1      |
| 6   | Output 3      |
| 7   | Ground        |
| 8   | Input Common  |
| 9   | Host RxD      |
| 10  | Host TxD      |
| 11  | Output 2      |
| 12  | Output Common |

#### Connector B – M12 8-Pin Socket – Ethernet

Figure A-2 shows the M12 8-pin socket at connector B.

FIGURE A-2. Connector B – M12 8-Pin Socket

| TABLE | A–2. | Connector | B – M12 | 8-Pin | Socket |
|-------|------|-----------|---------|-------|--------|
|       |      |           |         |       |        |

| Pin | Function   |
|-----|------------|
| 1   | Terminated |
| 2   | Terminated |
| 3   | Terminated |
| 4   | TX (–)     |
| 5   | RX (+)     |
| 6   | TX (+)     |
| 7   | Terminated |
| 8   | RX (–)     |

## APPENDIX B Cable Specifications

This section contains information about Vision HAWK Smart Camera cables.

Note: Cable specifications are published for information only. Microscan does not guarantee the performance or quality of cables provided by other suppliers.

| TABLE B-1. | Cable | Part | Numbers | and | Descri | ptions |
|------------|-------|------|---------|-----|--------|--------|
|            |       |      |         |     |        |        |

| Part Number  | Descriptions   |
|--------------|--|
| 61-000160-01 | Cable, Host, Ethernet, M12 8-pin Plug to RJ45, 1 m       |
| 61-000162-01 | Cable, Common, M12 12-pin Plug to M12 12-pin Socket, 1 m |
| 97-000003-01 | Power Supply, M12 12-pin Socket, 1.3 m                   |
| 99-000020-02 | Trigger, M12 4-pin Plug, NPN, Dark On, 2 m               |

#### 61-000160-01 Cable, Host, Ethernet, M12 8-pin Plug to RJ45, 1 m

The 61-000160-01 Cable, Host, Ethernet, M12 8-pin Plug to RJ45, 1 m is a 1 meter cable with an 8-pin M12 Ultra-Lock connector on one end and a standard RJ45 connector on the other end.

Figure B-1 shows the 61-000160-01 Cable, Host, Ethernet, M12 8-pin Plug to RJ45, 1 m.

#### FIGURE B-1. Cable, Host, Ethernet, M12 8-pin Plug to RJ45, 1 m

**Important:** Be sure that the retaining clip on the RJ45 connector has locked into place in the Ethernet receptacle on the PC and is not being impeded by the rubber housing.

Note: A screw-down version of this cable is also available (61-000160-02).

# 61-000162-01 Cable, Common, M12 12-pin Plug to M12 12-pin Socket, 1 m

The 61-000162-01 Cable, Common, M12 12-pin Plug to M12 12-pin Socket, 1 m is a 1 meter cable with a 12-pin M12 plug on one end and a 12-pin M12 socket on the other end.

Figure B-2 shows the 61-000162-01 Cable, Common, M12 12-pin Plug to M12 12-pin Socket, 1 m.

FIGURE B-2. Cable, Common, M12 12-pin Plug to M12 12-pin Socket, 1 m

Note: A screw-down version of this cable is also available (61-000162-02).

### 97-000003-01 Power Supply, M12 12-pin Socket, 1.3 m

The 97-000003-01 Power Supply, M12 12-pin Socket, 1.3 m is a 90-254 VAC, +24VDC power supply.

Figure B-3 shows the 97-000003-01 Power Supply, M12 12-pin Socket, 1.3 m.

FIGURE B-3. Power Supply, M12 12-pin Socket, 1.3 m

### 99-000020-02 Trigger, M12 4-pin Plug, NPN, Dark On, 2 m

The 99-000020-02 Trigger, M12 4-pin Plug, NPN, Dark On, 2 m is a photo sensor with a 4-pin M12 connector.

Figure B-4 shows the 99-000020-02 Trigger, M12 4-pin Plug, NPN, Dark On, 2 m.

#### FIGURE B-4. Trigger, M12 4-pin Plug, NPN, Dark On, 2 m
