

FOR IMMEDIATE RELEASE:

Microscan to instruct machine vision lighting course at The Vision Show

RENTON, WA, March 31, 2014 — Microscan, a global technology leader in barcode, machine vision and lighting solutions, announces the instruction of an educational machine vision course and product demonstrations at [The Vision Show](#). The Vision Show is organized by the Automated Imaging Association (AIA) and is scheduled to take place April 15–17, 2014 at the Hynes Convention Center in Boston. In Booth 323, Microscan will actively demonstrate their wide range of products including the latest innovations in [AutoVISION® machine vision software and hardware](#).

In addition to in-booth product demonstrations, Microscan course instructor Dr. Jonathan Ludlow will be instructing “Advanced Vision Lighting”, the 2nd tutorial in the AIA’s CVP program and part of its advanced certification track. It will take place at [The Vision Conference](#) from 8:00 to 10:00 AM on Monday, April 14. Dr. Ludlow will guide users in designing lighting for complex applications such as these, and cover topics including color, polarized light, strobing, and new developments in lighting control. In the course of the presentation, attendees will learn to improve lighting engineering skills by taking an analytical look at everyday images in movies, TV, and photo journalism.

Dr. Ludlow, Machine Vision Product Promoter, has instructed machine vision technology courses for AIA for multiple years and brings more than 20 years of expertise in machine vision technology. He has authored papers on the application of machine vision in semiconductor packaging and electronic assembly, holds several patents relating to inspection systems, and is a regular speaker at machine vision symposia.
