

FOR IMMEDIATE RELEASE:

Microscan Hosts Free Hands-On Machine Vision Training in Montreal

RENTON, WA, September 2, 2014 – Microscan, a global technology leader in barcode, machine vision and lighting solutions, announces a free New Technology Workshop featuring the latest in easy-to-use machine vision technology. This hands-on event will be hosted by Microscan and Microscan Vision Select Partner [Rotalec](#)

at the Rotalec head office in Montreal, Quebec, on

October 8, 2014. Attendance is free and [online registration](#) is available for users from beginner to expert to learn the latest capabilities of automated inspection, from part and label inspection, to barcode quality verification, to remote, web-based inspection monitoring.

Part of Microscan's Regional Training program, this workshop offers users the chance to get hands-on with Microscan's award-winning [AutoVISION® Machine Vision Software](#) in labs led by Microscan and Rotalec solutions engineers. The AutoVISION machine vision family, including the new CloudLink mobile monitoring interface and Vision MINI Xi miniature Ethernet smart camera, will be showcased during the workshop. Attendees will be guided to create their own CloudLink dashboard from AutoVISION's software emulator to see real-time inspection data from their machine vision job displayed in a web browser. After practicing with the software, attendees will be invited to meet and collaborate with automation experts from both Microscan and Rotalec to learn how new technology can benefit their operations with faster production speeds, fewer errors, and less waste using the simplest barcode reading and inspection technology on the market. Machine vision and auto ID technology experts will be available to offer one-on-one guidance on attendees' specific applications and automation projects, and attendees are invited to bring their parts and codes to the event to discuss with the Microscan and Rotalec teams. Special discounts on AutoVISION smart cameras are available to all participants as a part of the training program.

Microscan's new generation of barcode and machine vision inspection tools empower every user to incorporate automation into their operations without the need for advanced training or the hassle of complex technology. For online registration and a complete list of Microscan Regional Training events, visit www.microscan.com/training.aspx.

About Microscan

Microscan is a global leader in technology for precision data acquisition and control solutions serving a wide range of automation and OEM applications. Founded in 1982, Microscan has a strong history of technology innovation that includes the invention of the first laser diode barcode scanner and the 2D symbology, Data Matrix. Today, Microscan remains a technology leader in automatic identification and machine vision with extensive solutions for ID tracking, traceability and inspection ranging from basic barcode reading up to complex machine vision inspection, identification, and measurement.

As an ISO 9001:2008 certified company recognized for quality leadership in the U.S., Microscan is known and trusted by customers worldwide as a provider of quality, high precision products. Microscan is a [Spectris](#) company.
