

FOR IMMEDIATE RELEASE:

Microscan Launches New Web Site to Keep Pace with Growth

RENTON, WA, June 2009 — Microscan, a global technology leader for precision data acquisition and control solutions, has launched a new information-rich version of its popular web site, www.microscan.com. The new global web site reflects the company's recent growth, as Microscan's technology, patents, products and solutions offerings have tripled in the last twelve months.

The new site is simpler to navigate, provides more detailed information and enhanced user features, and reflects the company's global growth in technology, products, and solutions.

Microscan's range of technology is showcased in a new section providing educational information on machine vision, machine vision lighting, barcodes, and verification. An expanded section on solutions now includes industry and engineered solution content. New user experience features have been added, such as a video library for viewing product demonstrations and a free trial of Visionscape® machine vision software.

"Microscan has grown beyond barcode," states Microscan president Jeff Timms. "We have grown beyond a product manufacturer and into a company focused on providing Track, Trace, and Control solutions to key markets, segments and customers. This is a completely different company now than it was just one year ago and our new web site reflects this growth."

The web site is now available in nine languages.

For more information and to view the updated web site, visit www.microscan.com.

About Microscan

Microscan is a global leader in technology for precision data acquisition and control solutions serving a wide range of automation and OEM applications. Founded in 1982, Microscan has a strong history of technology innovation that includes the invention of the first laser diode barcode scanner and the 2D symbology, Data Matrix. Today, Microscan remains a technology leader in machine vision and automatic identification with extensive solutions ranging from basic barcode reading up to complex machine vision inspection, gauging, and measurement.

As an ISO 9001:2000 certified company recognized for quality leadership in the U.S., Microscan is known and trusted by customers worldwide as a provider of quality, high precision products. Microscan is a Spectris company.
