Product: AutoVISION 5.0.1
Type: Product Update

AutoVISION 5.0.1 – Release Notes

Summary:

AutoVISION is machine vision simplified. The AutoVISION interface is the easiest vision software available for applications of basic to mid-range complexity.

Important: While every attempt is made to ensure forward and backward compatibility, Omron Microscan recommends that users test all features to verify expected functionality when upgrading to new firmware and software.

Announcement	Description	Benefits
--------------	-------------	----------
