Compact Lighting Solution

Omron Microscan’s wide range of NERLITE products can illuminate any part or mark for successful machine vision and auto ID applications.

Bar lights are an economical source of uniform incident lighting in a low profile, compact shape. Useful for both dark field (creating shadows and specular reflection) and bright field lighting, adjustments to working distance and angle provide good image contrast on diffused surfaces. Models for continuous or strobe operation support static or high speed applications.

Bar Light: At a Glance

- Economical, general purpose design
- Provides even illumination in a concentrated area
- Address a broad range of applications via light positioning in bright field or dark field
- Variety of colors and sizes for both continuous and strobe operation
- Sturdy housings combined with LEDs rated at up to 50,000 hours
- Diffuser accessory included
