

Microscan Supply Chain Regulated Substances Specification

Dear valued supplier,

Microscan is committed to designing and manufacturing products that are socially and environmentally responsible. Our supply chain has a key role in achieving this mission.

We require our suppliers to adhere to this Regulated Substances Specification which lists the global restrictions and declarations on the use of certain chemical substances and/or materials in our products, accessories, manufacturing processes, and packaging used for shipping products to our customers. These restrictions are based on international and national laws or directives which apply to Microscan's products.

We hold our suppliers accountable for the accuracy of the information they provide to Microscan in the form of Certificate of Compliance (CoC), company statement or Declaration of Conformity (DoC) documents. As needed, we may verify the conformity by conducting factory audits, or testing components at independent laboratories.

Regulation	Description	Requirement
EU RoHS2 Frequently asked questions	<p>The European RoHS Directive (2011/65/EU) restricts the use of 6 hazardous substances in electronic equipment sold in the EU. RoHS restricts Lead, Mercury, Hexavalent Chromium, and flame retardants PBB and PBDE, to no more than 0.1% by weight in any "homogeneous material" in any part, and it restricts Cadmium to 0.01% by weight. In accordance with 76/769/EEC RoHS-Compliant products and packaging do not contain intentionally added Deca-BDE, Perfluorooctanes (PFOS) or Perfluorooctanic Acid (PFOA) compounds above the maximum trace levels.</p> <p>Some classes of electronic equipment are excluded from the scope of RoHS, and RoHS also allows exemptions for some very specific materials and applications.</p>	<ul style="list-style-type: none"> • A Certificate of Compliance or Declaration of Conformity for all applied parts and materials supplied to Microscan • Suppliers have to identify and report any exemptions that applies to Microscan parts and materials
EU REACH European Chemical Agency	<p>The European REACH Regulation ((EC) No 1907/2006) regulates a large number of substances, better known as SVHC or "Substances of Very High Concern". SVHCs will be declared if they are present in the article above 0.1% of the article's weight.</p> <p>Every 6 months, approximately, more substances are added to the Candidate List.</p>	<ul style="list-style-type: none"> • Declaration of Conformity which reports any SVHC constitutes greater than 0.1% of the weight of any article/part or product supplied to Microscan • It is also required that parts and materials supplied to Microscan shall not contain SVHC's that are subject to Authorization or Restriction.
U.S. Conflict Minerals The Conflict Minerals reporting template, Revision, along with training materials	<p>The SEC rules on Conflict Minerals, under Dodd-Frank Section 1502, requires that U.S. publicly traded companies disclose their use and source of conflict minerals that originate from the Democratic Republic of the Congo (DRC) or adjoining countries. The conflict minerals are tantalum, tin, tungsten and gold, also known as 3TG. 3TG need to be disclosed if those minerals are "intentionally added and necessary to the functionality or production of a product".</p>	<ul style="list-style-type: none"> • If a suppliers product contains any of these 3TG minerals, then the supplier is required to provide Microscan with an EICC/GeSI Conflict Minerals Report Template (CMRT) in the most current released template version.

We thank you in advance for your support.
